WHO WE ARE

Founded in 2012 in the city of Lorena, located in between São Paulo and Rio de Janeiro, Veloplast develops single & multi-layer plastic packaging solutions to multiple segments, including agrochemicals, chemicals, oils and specialized solutions, all of which require a high degree of technology when it comes to packaging. Covering all of Brazil's territory, Veloplast offers the best quality in plastic gallons and bottles, made with state-of-the-art blow moulding technology. We develop, together with you, the ideal packaging for your product and deliver complete solutions: according to the most precise specifications, with the highest cost-benefit relation and committed with the most rigorous environmental and technical standards.

OUR GUIDELINES

- 
OUR MISSION To develop and manufacture plastic packages that meet all of our clients requirements, with the constant adoption of new technologies that contribute for a more sustainable society.
- 
OUR VISION To be a reference in the Brazilian plastic packaging market, always providing the highest quality standards, degrees of customer satisfaction and business sustainability.
- 
OUR VALUES **QUALITY, CLIENT SATISFACTION, INNOVATION AND COMMITMENT.**

PRODUCTS & TECHNOLOGIES

Veloplast has, as its business foundations, innovation and commitment. That why it researches and develops technologies that assures its products are of the utmost quality, providing safety during each step of your production line, since the bottling of your product all the way to its use by the end consumer. Veloplast has 3 main technologies used in its processes – Single Layer Blow Moulding / Multi-Layer Blow Moulding / Injection Moulding – all of which comply with the highest quality standards of the industry.

QUALITY

Here at Veloplast, quality is not only a competitive edge, but a core value of the company, taken in account in every decision made. With a focus on innovation and continuous improvement, the company encourages the refinement of its processes and of its team members, to assure compliance with the necessities of its clients, suppliers and partners. As a result, Veloplast was able to obtain multiple certificates, one of which is the ISO 9001:2015, obtained in 2012. Apart from that certificate, Veloplast packaging solutions are also homologated for dangerous products transportation via air, water and land methods.
